Riviera Hotel, Las Vegas
Price: Before 10/08 \$695, After \$795

REMANUFACTURING PLANNING & EXECUTION WORKSHOP

Develop your basic skills and understanding of essential remanufacturing operations. Discover tools and techniques that will help you overcome common job performance obstacles and return to work knowing how to:

- Develop a master schedule
- Perform rough-cut capacity calculations
- Build a bill of material and router file
- Reschedule the master schedule
- Analyze performance measurements
- Apply total quality management application
- Implement Just-In-Time in remanufacturing
- Use of shop floor control to manage scheduling
- Apply drum-buffer-robe to identify constraints and maximize throughput u Learn how to create solutions for customer demands

Instructor: John Fargher, PhD, Vice President, Missouri Enterprise Business Assistance Center and Former Chair of APICS REMANSP SIG
